

# EarnByHold Whitepaper

The Revolutionary Passive Income Token

Version 1.6 · March 2025 · A WorldApps.net Project

## Executive Summary

EarnByHold (EBH) represents a paradigm shift in cryptocurrency investments - combining the explosive growth potential of blockchain with **real revenue sharing** from profitable WorldApps projects. EBH isn't just another token; it's a **sustainable wealth generation engine** that rewards holders simply for participating in the ecosystem.

With our **proprietary revenue-sharing model**, transparent tokenomics, and growing suite of applications including WorldCalculate Analytics, WorldSale Marketplace, WorldClassifieds Network, and GoDeliver Logistics, EBH offers investors an unprecedented opportunity to earn passive income while supporting innovative blockchain solutions.

- What Makes EBH Unique
- Tokenomics
- Revenue Sharing
- Roadmap
- Team

## What Makes EBH Unique?

### The Power of Revenue Sharing

Unlike traditional cryptocurrencies that rely solely on market speculation, EBH generates **real revenue** from WorldApps products and services, distributing a portion directly to token holders.

Our automated system ensures **transparent, regular payouts** proportional to your EBH holdings - creating a true "earn while you hold" ecosystem across multiple platforms including advanced analytics, e-commerce, classifieds, and logistics solutions.

#### Automatic Distributions

Monthly revenue shares sent directly to your wallet - no claiming required

#### Growth Potential

As WorldApps expands with multiple platforms, your revenue share grows exponentially

#### Sustainable Model

Revenue from real products across multiple industries ensures long-term viability

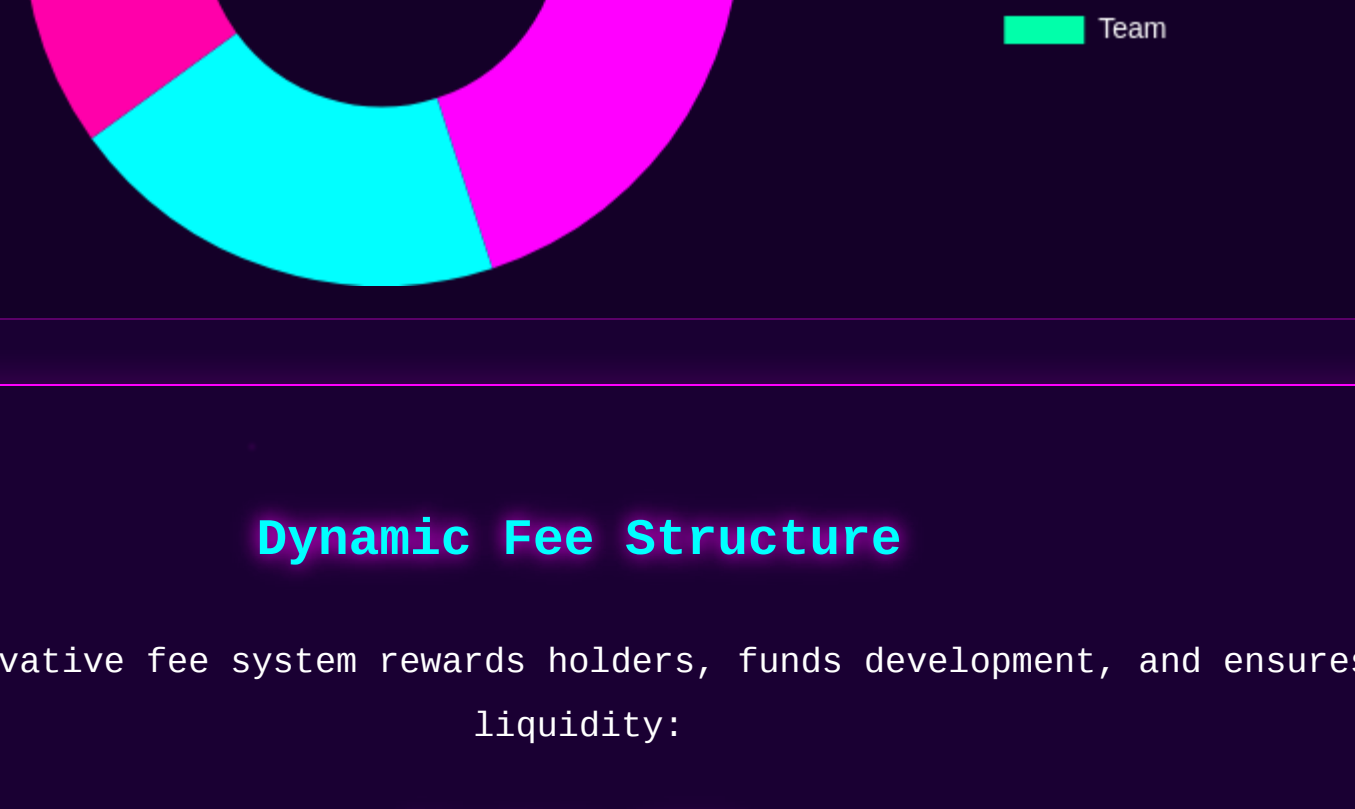

#### Global Ecosystem

Multiple revenue streams from diverse applications serving millions worldwide

## EBH Tokenomics

Our carefully designed token economy ensures stability, growth, and fair distribution:

Token Allocation (%)

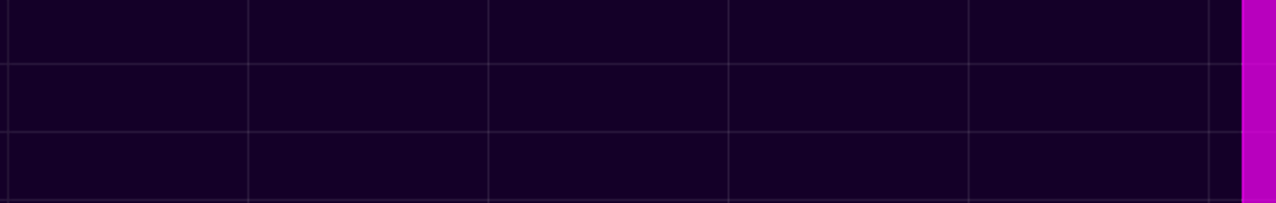

## Dynamic Fee Structure

EBH's innovative fee system rewards holders, funds development, and ensures liquidity:

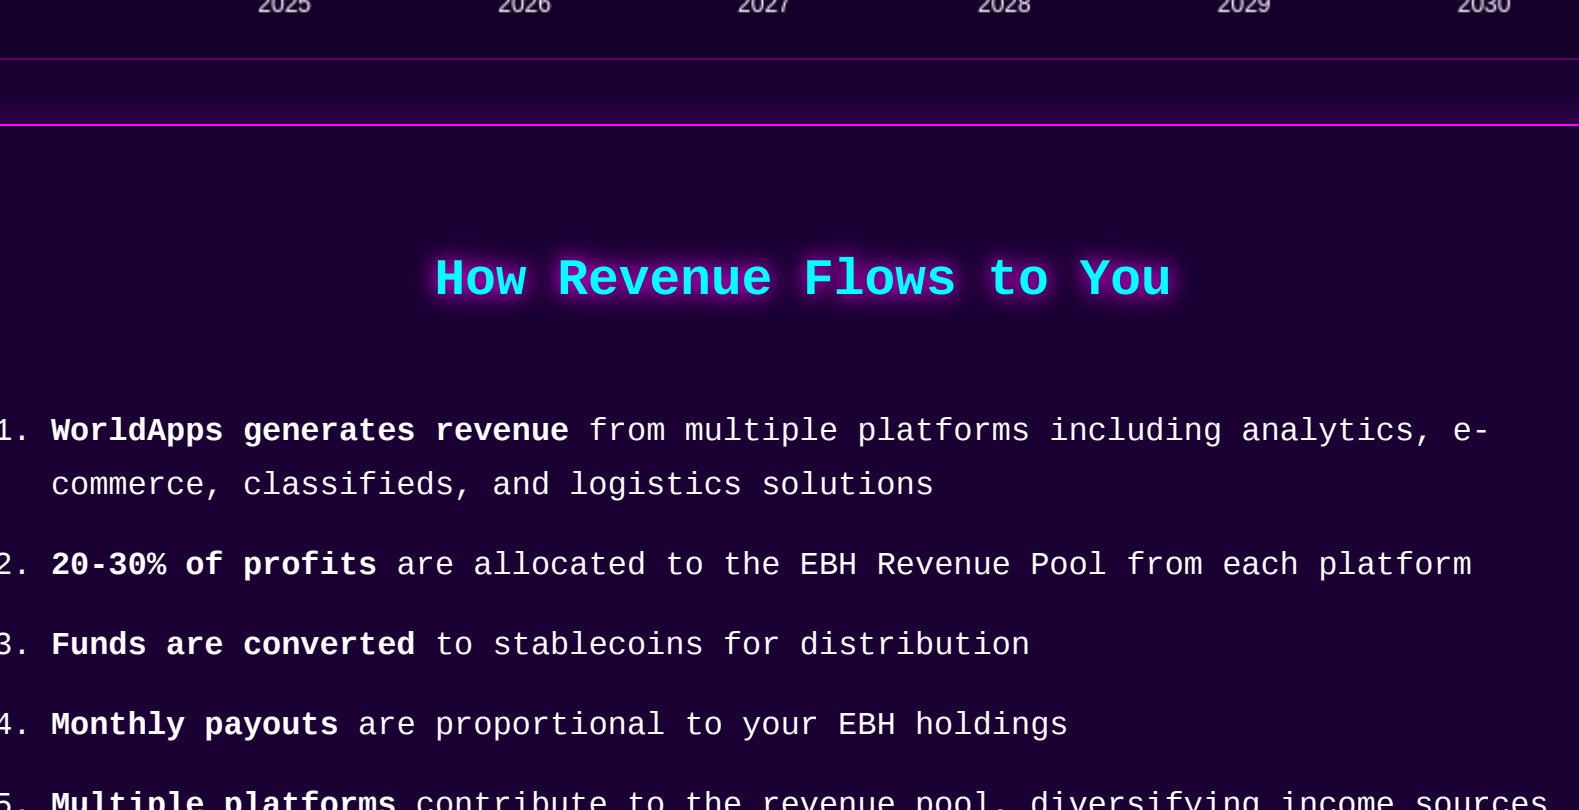

### Buy Fees (10%)

### Sell Fees (12%)

## Revenue Sharing Breakdown

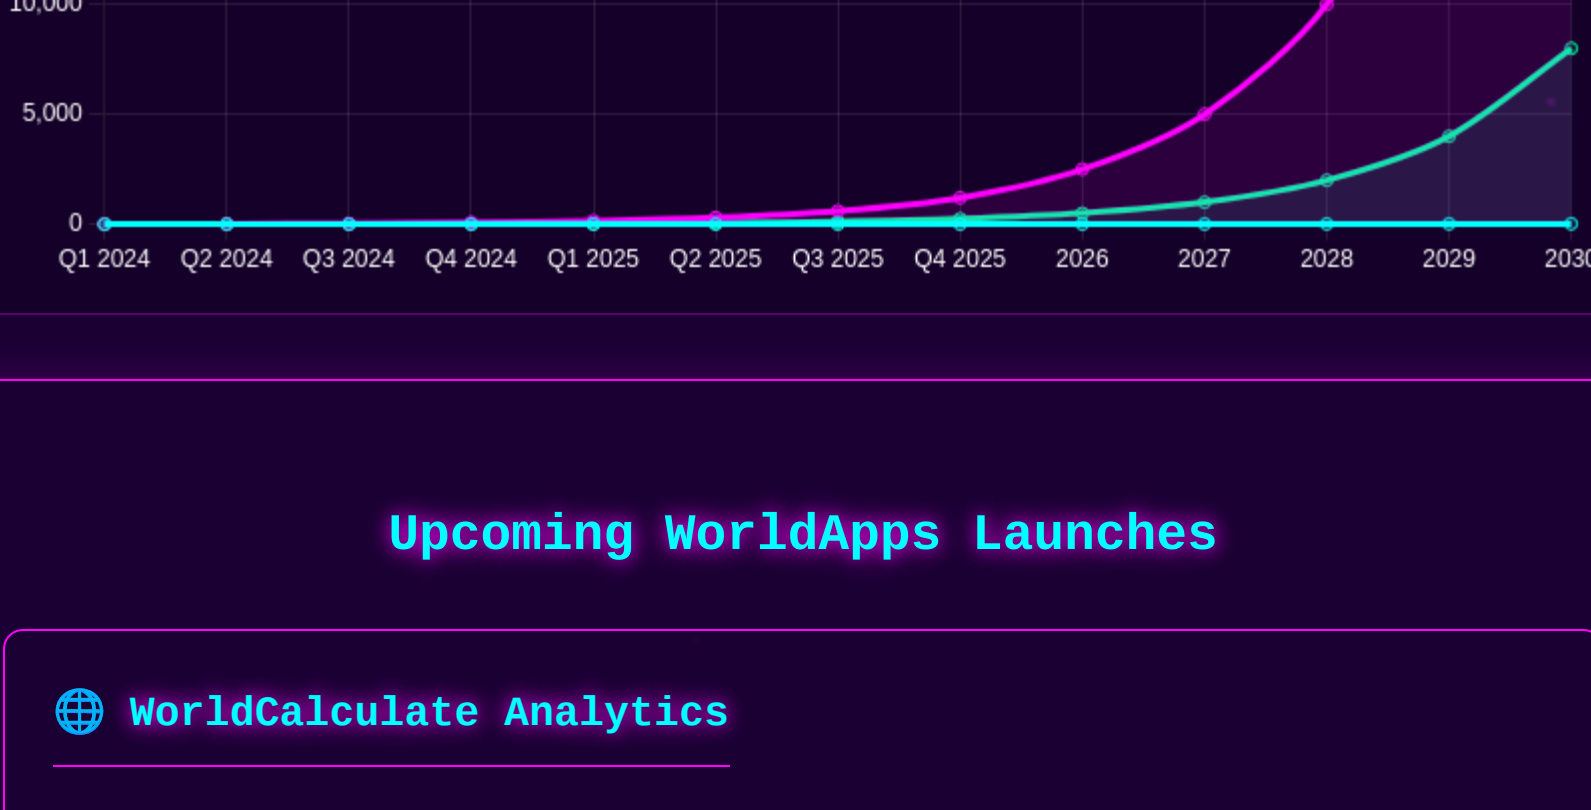

## How Revenue Flows to You

- WorldApps generates revenue from multiple platforms including analytics, e-commerce, classifieds, and logistics solutions
- 20-30% of profits are allocated to the EBH Revenue Pool from each platform
- Funds are converted to stablecoins for distribution
- Monthly payouts are proportional to your EBH holdings
- Multiple platforms contribute to the revenue pool, diversifying income sources

"The more EBH you hold, the larger your share of our growing revenue pool becomes across all WorldApps platforms."

## Project Roadmap

## Upcoming WorldApps Launches

### WorldCalculate Analytics

Crypto Analytics Hub providing comprehensive tools for investors and traders:

- DEX/CEX and upcoming airdrops and presale tools
- Real-time crypto market data with advanced charting
- Mining profitability calculator with multi-algorithm support
- Portfolio tracking tools with performance analytics
- EBH token price integration and staking rewards calculator

### WorldSale Marketplace

Web3 E-Commerce Marketplace revolutionizing online shopping:

- Decentralized e-commerce platform with smart contract escrow
- Crypto rewards program for buyers and sellers
- Decentralized escrow system with multi-sig security
- Dual EBH/USDW payment options with instant conversion
- Reputation system built on blockchain verification

### WorldClassifieds Network

Decentralized classified Ads Network for global users:

- Free classified ads platform with crypto rewards
- EBH token incentives for user engagement and content creation
- Decentralized ad verification system with community moderation
- USDW-powered transactions with low fees
- Geolocation services for local buying and selling

### GoDeliver Logistics

Hyper-Local Blockchain Logistics Network:

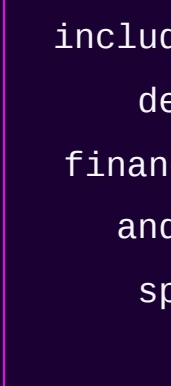

- Hyper-local delivery network with real-time tracking
- Blockchain-tracked shipments with immutable records
- Partner business integration system for merchants
- EBH rewards for delivery nodes and network participants
- Smart contract-based payment releases upon delivery confirmation

Each new platform will contribute to the EBH revenue pool, increasing rewards for all token holders while expanding our ecosystem's utility and market reach.

## Meet The Visionaries

### Hassan ALRowaie

Founder & CEO

Blockchain pioneer with 10+ years in software development and cryptocurrency ecosystems. Hassan's vision for merging practical applications with decentralized finance led to the creation of WorldApps and the EBH token.
